-PROJECTS-

GROUND OUT (Angularjs, jQuery, Firebase)

groundout.firebaseio.com

github.com/adamsheaffer/groundout

Ground Out is a single page application using Angular and Firebase. It's targeted toward baseball lovers and travelers who are interested in visiting every ballpark in America. Users log their experience to each park, while viewing others' comments and earning badges as they go. Through the use of the SeatGeek api, users can also search for the cheapest tickets to every ballgame.

VINYLWOOF (ASP.NET MVC, AngularJS)

vinylwoof.azurewebsites.net

github.com/adamsheaffer/thevinylwoof

VinylWoof is a mini single page application designed for record collectors to give up their old albums. In return, they earn credits which allow them to collect other users' records. The back end is built using ASP.NET MVC. The client side employees AngularJS and uses the Last.fm api.

-EXPERIENCE-

NASHVILLE SOFTWARE SCHOOL

APPRENTICE DEVELOPER 2014-2015

Attended full-time intensive 6 month bootcamp that focuses on full stack web development. Developed multiple applications using the MVC and Repository design patterns while practicing test driven development. Employed a range of front and back end technologies while working both individually and in teams.

INTERNATIONAL SONGWRITING COMPETITION

HEAD OF ARTIST RELATIONS 2012-2014

Managed all internal and third party entry platforms including Sonichids, Reverbnation, Broadjam, and Music Xray. Maintained database of all entrants using Filemaker Pro. Managed special competition promotions resulting in a 30% increase in competition submissions. Oversaw the distribution of prizes from competition sponsors to winners. Handled basic website content upkeep.
