-PROJECTS-

GROUND OUT Angularjs, jQuery, Firebase groundout.firebaseioapp.com

Ground Out is a single page application using Angular and Firebase. It's targeted toward baseball lovers and travelers who are interested in visiting every ballpark in America. Users log their experience to each park, while viewing others' comments and earning badges as they go. Through the use of the SeatGeek api, users can also search for the cheapest tickets to every ballgame.

GIN MIXER WPF, .NET, SQL Express github.com/adamsheaffer/cocktailapp

Gin Mixer is a desktop application built on the .NET framework and uses the repository design pattern. Users select which ingredients they have on hand and are given a list of possible cocktail recipes they can make. Users can also add their own recipes to the library. The app uses unit and behavior testing through XUnit and Test Stack White.

-EXPERIENCE-

NASHVILLE SOFTWARE SCHOOL APPRENTICE DEVELOPER 2014-2015

Attended full-time intensive 6 month bootcamp that focuses on full stack web development. Developed multiple applications using the MVC and Repository design patterns while practicing test driven development. Employed a range of front and back end technologies while working both individually and in teams

INTERNATIONAL SONGWRITING COMPETITION HEAD OF ARTIST RELATIONS 2012-2014

Managed all internal and third party entry platforms including Sonicbids, ReverbNation, Broadjam, and Music Xray. Maintained database of all entrants using Filemaker Pro. Managed special competition promotions resulting in a 30% increase in competition submissions. Oversaw the distribution of prizes from competition sponsors to winners. Handled basic website content upkeep.

-TECHNOLOGIES-
